History/Years in Business

Anchor Environmental was formed in 1997 by a number of senior sediment scientists, sediment remediation engineers, and environmental permitting specialists, each with substantial experience assisting public and private industry. Today, Anchor has a team of over 100 scientists, engineers, landscape architects and planners assisting clients with shoreline and aquatic-based projects across North America.

Geographic Area Served

Anchor serves clients throughout the Pacific Northwest, the east coast, west coast, Gulf of Mexico, Great Lakes, Alaska, and Canada.
