## Description of Services

Kennedy/Jenks Consultants offers consulting services in water supply, water quality, water and wastewater treatment, water reclamation, and stormwater management, solid and hazardous waste investigation and remediation, environmental compliance and permitting, industrial process engineering, utility systems, and airport/seaport engineering.

## History/Years in Business

Kennedy/Jenks has 22 offices throughout the western United States serving private and public sector clients. Airports and seaports are core business sectors that we serve. Our 85-year history provides unique insight into the evolution of Federal, state, and local environmental regulations and construction standards. This knowledge, combined with intelligent application of up-to-date technology, enables Kennedy/Jenks to provide practical, cost-effective solutions to our clients' environmental and engineering needs.

**Geographic Area Served**

Primarily Western United States
