---

**Description of Services:** The firm provides comprehensive planning and architectural design services, including facilities programming, site planning and estimating, permit processing, documentation, and construction observation for the interfacing of the public with port facilities. We employ the latest technology in computer aided design and production to assure that actual construction processes are more efficient by applying preferred project management systems. These leading edge, industry capabilities enable us to successfully complete projects on time and within budget.

**Services:**

- Architecture
- Facility Engineering
- Permit Management
- Communications
- Land-Use Planning

**History/Years in Business:** RMC Architects was established in 1986 to provide professional services in an atmosphere of responsiveness and commitment. The principals, Jeff McClure and Brad Cornwell, are experienced in all phases of project development. Together, they have worked on numerous projects of varying size and complexity ranging from the intricacy of large mixed-use commercial projects, to the intimacy of small public spaces.

**Geographic Area Served:** Primarily Northwest Washington, with special regional projects in Washington and Oregon.
