Ecological Land Services, Inc. (ELS) is based out of Longview, Washington and has been working in the local community and the Pacific Northwest since 1996 and now in Southeast Alaska.

We provide high quality environmental permitting and documentation services specializing in land, water, and shoreline projects involving resources such as wetlands, streams, rivers, wildlife habitat, and sensitive, threatened and endangered wildlife and plant species.

As a company, we approach each project individually by understanding our client's purpose and needs, and then identifying the environmental constraints of those needs. By working with our clients to develop an efficient project strategy that considers both their financial bottom line and the environmental component, we help them realize the best path to complete the project in the shortest amount of time.

We are dedicated to providing our clients with efficient, cost-effective, and creative environmental solutions, and creative environmental solutions and products.

Wetland services covering the complete range of wetland related issues from simple wetland determinations and delineations to complex mitigation projects.

Stream services addressing mapping, assessment, permitting, fish passage, restoration plants, channel design, erosion control, and dewatering and removal.

Wildlife, Habitat, and Endangered Species services at local, state, and federal levels for birds, fish, amphibians, reptiles, mammals, and their habitats including baseline surveys, habitat restoration or enhancement projects, and ESA compliance.

Permitting services for all local, state, and federal agencies on a wide range of environmental resources.

Additional services include CAD design, shorelines, stormwater pollution prevention plans, site preparation and maintenance, botanical surveys, forestry, and landscape enhancement.

ELS is a small business with 20 employees.
