2021	118862.84	72.19	180.82	97.58	190.88	112022.1	231426.4
2022	6283.62	14851.86	16.82	117.25	63.82	37033.16	58366.53
2023	2,583	61703.08	16584.8	524.32	21366.87	179.89	102,942
Total	763206.85	77902.17	17132.27	2863.05	24852.4	365467.8	1251425
Twelve year average 2012-2023	63600.571	6491.8	1427.7	238.5875	2071.033333	30455.65	104285.4

Large Fires of Concern

Role in Disaster Preparedness

- Direct response for 12.7 million acres of forestland in WA
- Staffing of IMTs for all hazard response
- Prevention and Mitigation
- Regulation
- Participate with state and federal emergency management in staffing support function, and sharing personnel and equipment and supplies in a natural disaster event

Roles in Comprehensive State Emergency Management Plan

- Lead Agency for ESF 4 – Firefighting Response (Cooperate with Washington Fire Service)
- Lead Agency for federal ESF-4 – Federal assistance in partnership with the USFS for Stafford Act Response
- Staffing of teams for All Hazard Response
- Support to several other ESF's, notable with a commitment to maintain two medium helicopters to have available for other disaster response, 365 days per year.
 - Flying in mobile repeaters
 - Logistical missions
 - Search and Rescue
- DNR maintains a supply cache and logistical resources and robust communication infrastructure that can be mobilized for disaster response
- Detection cameras

Wildland Fire Management Division interaction with Ports

- Protecting agency - direct protection or support role to wildland owned by Port Districts.
- Prevention and Mitigation –
 - Activities that shout watch out – equipment use, recreation, railroad
 - CWPPs, Fuels Treatment, Hardening
- Aviation
 - DNR works with 13 airports for permanent air base use
 - The need for Emergency Land Use agreements (EULA) happens every summer for seasonal helibases to support large incidents
 - Fixed Base Operators (FBO's) are key resources for transitory operations and fueling
 - The availability of Jet A fuel is a determining factor on where we can operate and for how long. Starting in 2024, all DNR owned and contracted aircraft will be operating on Jet A. The need is approximately 500,000 gallons.
 - Bulk supplies are helpful as sources for DNR's fleet of mobile fuel support trucks and trailers.
- We protect several islands in Puget Sound, which occasionally requires boat, ferries or barge transport of crews, equipment and supplies. However, could do that anywhere – may look to ports for contacts for those that could help in that.

Thank You!
